2D Stickers Graphic

– Design Output Specifications

Outsourcing Designers Design Guideline

# - Hello !

Welcome to become part of **LEMOCAM** ^_^

AR EFFECT
STICKER GROUP

1. Size

1. Please open「2D standard template. psd」
2. The final design should be presented within the box（540*960px，ppi72）. If dynamic effect needs to be presented out of the box, you should complete the part that beyond the box.
3. You can enlarge the canvas if needed, but make sure to reduce it according to the standard

2. Layer

1. Please create layers for different part. Complete the covered part of a layer. Rename each layer in English letters.

2. Please merge the highlight and glow effect of one object

3. Create a layer set for one object (e.g. glasses, please group the glasses frame layer and the lens layer into "glasses")

4. Please rasterize all layers

5. Please create two layers to present different states of one object (e.g. opening mouth and closing mouth)

6. Please offer the text description of the dynamic effect
